Coalition To Legalize Video Gaming Meets Here

The Indiana Licensed Beverage Association is starting a coalition to legalize video gaming. They held a meeting to garner support Thursday.

They estimate there are 40,000 video gaming machines around the state operating illegally, in truck stops, convenience stores

They want to legalize the machines but restrict access to minors. They would do that by only legalizing them in clubs or bars where be 21.

They make the point that Indiana has casinos, horse tracks, lottery tickets and bingo. They say why not legitimize these machines

Benefits of legalization they cite include being able to regulate the number of machines there are as well as the payouts.

They also say it could mean 300 million dollars in tax revenue for the state and 100 million for the counties.

The group is meeting with interested parties all over the state this month.
